

15 AUG 1975

MEMORANDUM FOR: Review Staff

ATTENTION: Mr. Elder

1. Your query to the Executive Registry on what material was made available to the Rockefeller Commission and its staff gives us a bit of a problem.

2. Hopefully, our records are complete on what material was sent to the Inspector General or the Review Staff for in-house review prior to the release to the Rockefeller Commission, but we have no way of knowing if the material was eventually made available to them. As you know, release of most of it required review by the Associate Deputies group, and throughout these investigations we continued to count on your records as to what material is made available to various investigative bodies. Attached are listings of files made available. When Eunice gets back on Monday, we may be able to add to the attached.

7 August 1975

MEMORANDUM FOR: Dr. Chamberlain

There were three boxes of material retired to Records Center as "official Helms files." ER did not have a list of the material contained in the three boxes until Mr. Knoche [redacted] made the attached list. As you probably remember, we gave you the three boxes for use during the Rockefeller Commission investigation. I understand that they were kept in a safe assigned to the Rockefeller Commission staff here at Headquarters. The Rockefeller Commission staff turned them over to Mr. Knoche's secretary who in turn returned them to ER custody on 5 May 1975. The Helms calendars were returned to ER by your office on 6 June 1975. The Helms files have not been reviewed by the SSC while in ER custody. The attached list covers the material contained in two of the three "official Helms" boxes. The third box, which I have retained, is a bound set of Studies in Intelligence.

25X1

Please provide Executive Registry with a copy of any material you reproduce from these files.
